Survivors

Survivors:

- `/passwordreset` - resets the in-game password for the account tied to the user's discord id
  - This works in any text channel in Discord
  - The results of the command are hidden, you can do this in #general and nobody will see it
  - This will not work for admins, admin accounts are built different
  - Requires a whitelist entry in both databases
  - Options:
    - password: Define a custom password here. If left blank, a random password will be generated for you.
