

# Sanctuary Community Rules

## Community Rules for Sanctuary:

These rules only apply to Sanctuary and anything within its walls. If there are breaches of these rules, the Admins will action any resolutions without notice. Repeated breaches may result in a revocation of Shop privileges or even a ban,

- No Placed items.
  - "Placed" items are those that create a 3D model in game, it's these models that cause FPS issues in great numbers. Furniture and other sprite-based tiles are perfectly fine and are not affected by this rule.
  - Floor Wipes will always occur on a Friday (Afternoon US) as needed and without extra warning.
  - Any Placed items will be deleted in the Floor Wipes. No items will be restored.
  - Containers are safe and will not be affected, make sure all your items are in containers.
- You can make a sign on top of your shop plot.
- You can build interior walls to divide the shop up.
- You can change the exterior walls.
  - Don't use more than a few window or glass tiles for performance reasons.
- You can change the walls between shops, check in with your neighbor first in case of decorations etc.
- You can add a delivery door at the rear of the shop if your shop has that possibility.
