#6 - No combat logging.

Combat logging violates the spirit of the game. A player found to be combat logging will receive a warning. Second time you will be killed upon log in. Further instances risk a permanent ban.

Combat logging is forcing the game to close or disconnect (e.g. Alt + F4) so that an impending death does not happen to you. We have login protections in place to ensure players can login safely, we expect you will take your deaths as and when they come to you.
