

Power Restoration and Gas Shipment - October 24th, 1995

Mission Briefing

Apollo:

“ Survivors, I hope everything is going well. Since the “exciting” events of last week, we’ve heard or seen very little of our Requiem “friends”. I urge you not to become complacent though, I don’t think their threat was empty. In somewhat lighter news, today we just need some help with restoring the power. Seems the storm earlier this week damaged some infrastructure.

Mission Debriefing

Apollo:

“ Survivors, power has successfully been restored through your efforts! We confirmed there were no sightings of the Requiem, which definitely has us worried. Until we hear different though, celebrate your access to power!
